**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --****Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The amended drawings were received on 2/16/06. These drawings are approved.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 3-7, 9, 13, 14, 16-20, and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wong in view of Peterson.

With regard to claims 1-3, 9, and 13-16, Wong discloses the claimed device with the exception of stating that the net is detachably attached to the base member. However, such detachable attachment with hooks 52 is commonly known in the art as typified by Peterson. It would have been obvious to one of ordinary skill in the art to have done the same with Wong's net to allow for easy replacement.

Regarding claims 4, 5, 17, and 18, the structure of Wong's loops is such that they are capable of being coilable in overlapping loops.

Regarding claims 6, 7, 19, and 20, the position of the actual hook (on the net or on the frame) is considered an obvious reversal of parts and therefore not a patentable distinction.

Claims 8 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over the art as applied to claims 1 and 13 respectively above, and further in view of Tallent. Claims 8 and 21 are obviated for the reasons explained in the claim 1 and 13 rejections with the exception of the target net. However, as disclosed by Tallent it is known in the art to use such on goal structures. It would have been obvious to one of ordinary skill in the art to have used such on Wong's device as well for practice purposes.

Regarding applicant's amendment and arguments, note Wong's supporting member 320 which is held in a sleeve of patch member 330 in the configuration claimed. This support member sustains the main member against the base member and maintains a substantial angle between these members.

Claims 10-12 and 23-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over the art as applied to claims 8 and 22 above respectively, and further in view of Cho '343 (Cho).

Claims 10-12 and 23-25 are obviated for the reasons expressed in the claim 8 and 22 rejections above respectively with the exception of the type of supporting member used between the main and base member. However, as disclosed by Cho it is known in the art to use a supporting member as claimed as the support between the main and base member. It would have been obvious to one of ordinary skill in the art to have used such as Wong's supporting member if it was desire to allow for the supporting member to be detached from the main and base members.

Applicant's arguments filed 2/16/06 have been fully considered but they are not persuasive for the reasons explained above.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 3711

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
